BUSINESS PROFILE

Company Name:
AN Products & Services B.V.

Headquarters:
Wadenoijen, Netherlands

Industry:
Computer Software

Business Environment:
• Business Type Private
• Employees 2

Customer information:
AN Products & Services is a full service supplier of track & trace solutions for cars, motorcycles, vessels, machines, trailers and much more.

We emphasize track & trace, journey registration, fleet management, security solutions and integrations of various systems.

AN Products & Services is your partner for all your GPS track & trace and IoT solutions.

BUSINESS CHALLENGE

Based in the Netherlands, AN Products & Services specialises in the development and supply of security solutions for high value items such cars, motorcycles, heavy duty plant and agricultural machinery, boats and trailers. The 123 Tracker and Trackpointer systems are linked to a private alarm centre and receiving platform build them selves.

With a focus on adding value and driving growth, the company was looking for a mapping and location content provider with a proven track record and an agile approach to customer support and development.

SOLUTION

The solution was very close to hand in Rotterdam – GeoJunxion has a well-established reputation across the industry for delivering effective and easily integrated technology, fast turn-around and excellent customer service.

It can offer the all-round package demanded by AN Products & Services including, the right products; cost-effective and stable pricing; a responsive technical support team; and an interest in working together to explore new possibilities.

The key GeoJunxion products supplied are the GeoCoder and Map Tile Server with OpenStreetMap Data (OSM). Implementation was seamless as AN Products & Services had previous experience with OSM.

RESULT: EFFECTIVE, ACCURATE AND EVOLVING

The very fast and efficient GeoJunxion Map Tile Server can supply maps with on-demand tile rendering, smart-tiling and custom styling. With smart tiling, all populated areas are pre-rendered to provide rapid responses to map requests. AN Products & Services is also finding that addresses and numerical coordinates are more accurate with the powerful GeoJunxion Geocoder.

Now able to track over 5,000 assets across Europe, the company is steadily continuing to expand and add new data layers to the maps.

BENEFITS

• Fresh, current data
• Accurate geocoding
• Pan-European coverage
• Clear and stable pricing
• Excellent support

"GeoJunxion is simply the right fit. A company which goes the extra mile to support its customers with a great combination of products, pricing and support. We are now able to move forward much more quickly with new ideas and developments."

Arie de Vree, Managing Director, AN Products & Services B.V.
