

Postal Code Products

Postal Code Boundaries are essential to location analytics and other geospatial analyses. AND not only offers Postal Code Data in point format, but also as boundaries including centroids and segments and is one of the only companies in the world to offer this data.

The coverage of AND Postal Code Data is available in the greatest possible detail. Additionally, AND provides Postal Code Data on ZIP5 and ZIP+4 level for the USA.

KEY FEATURES

- USA ZIP+4 Postal Code, Boundaries, Centroids.
- USA ZIP 5 Postal Code, Boundaries, Centroids, Segments.
- Worldwide Postal Code, Boundaries, Centroids, Segments.

TYPICAL USE CASES

The data supports a wide range of use cases. Examples are local search, logistics, finances and communications, planning, precisely targeted marketing, and enhanced navigation, to name but a few.
